BRAND LANDSCAPE

LEGACY OF EXCELLENCE

We seek to provide innovative, state of the art solutions and products to address the scientific technical and engineering obstacles faced by our clients in a wide variety of market. Our innovative relationship focused approach takes a forward looking view of customers need and anticipates future challenges.

CUSTOMER FOCUSED INNOVATION

Our strategy of developing customer focused innovations means that we are always looking towards the next generation of solutions and achievements.

Mission

Our team looks to utilize corporate and personal patents, innovative techniques and knowledge that in conjunction with the latest approach will allow our professionals, consultants and engineers to create pioneering solutions for the HealthCare Sector in Pakistan. It is our philosophy to ensure that we provide world class equipment, support and service at every point of contact with our customers. Our drive for excellence is matched by our commitments to ensuring the safety of our staff and end users of our equipment alike. We do not compromise on clients' relationship but take a long-term view to building lasting partnerships.

Understanding our clients' individual needs, enable us to design solution which meets all their unique needs as well as accounting for future development in a commercially attractive way.

It is vital that we recognize the individuality of our customers and understand them so that we can develop our solutions. If we do not know clients then we cannot meet their requirements.

Our company's infrastructure is oriented towards the conceptions of ground breaking technological solutions to succeed in the field we work in.

That is why our Slogan is

A LEGACY OF EXCELLENCE

EDUCATION AND TRAINING

CUSTOMERS FOR EQUIPMENT

Target audience:

- OPERATORS/END USRES
- DOCTORS
- TECHNICIANS

This includes hands-on training on the product operation.

HR

Target audience:

- ONSITE EMPLOYEES
- OFFSITE EMPLOYEES

This includes basic theory of product operation and features, product advantages and peculiarities. It also covers basic HR trainings on behavior, conduct and quality management.

CLIENTS FOR SERVICES

Target audience:

- SALES MANAGERS
- ASSISTANTS
- MACHINE OPERATORS

This includes in-depth training on product installation, set-up, maintenance and repair. Also includes training on conduct and behavior.

Employees are building blocks for an organization and therefore we strongly believe in continuous improvement and growth of our people. Regular training programs are being organized at SAARF Medical Solutions to meet the requirements of changing world and industry. Employees are encouraged to pursue higher education and training programs to not only enhance their own knowledge and skills but to add value to the organization as well. Training programs include on hand technical trainings and classroom workshops as well.

COMPETITIVE ADVANTAGES

All Under One Roof

One of the prominent quality that makes SAARF Medical Solutions unique and distinct from others in the market is that we offer solution for management of complex projects from supply of equipment to its operation, management and maintenance all under one roof.

Experience & Potential

At SAARF we have diversified experience, deep knowledge enriched with the potential of delivering the projects successfully. That's why our customers feel themselves in safe hands.

Safety and Social Responsibility

Being a member of the society, we work in, we consider ourselves responsible to contribute towards safety, security and growth of our society and the people who live there. We aim to provide every possible solution to their problems and help them growing with our trainings and education programs.

Excellence, Competency & Professionalism

We believe in professional attitude and dedication towards the commitments we make. We trust our team in terms of competency and excellence while performing their duties.

Quality Management System

To provide quality services and solutions to the clients, it is imperative to have a system implemented and operative within our organization first. We do follow internal quality management systems and have acquired the ISO certificates like ISO 9001:2015, ISO 18001:2007, 27001:2013 and ISO 14001:2015.
